 - workshops
 - Barcelona
 - Madrid
 - visits to:
 - Berlin
 - Rome
 - Brussels
- local partner
 - every one in its own country
 - *welcome for participation in site visit other countries (own budget, except for site visits combined with workshops)*

Guidelines for technical visits

1st draft - vs 13/01/11

Aim of technical visits

- the E-cosmos project wants to **get insight** in what happens in Spain, Germany, Italy and Belgium concerning
 - mobility management policy (work related)
 - role and involvement of trade unions (or workers representatives)
- the E-cosmos project wants to see and learn from **best practices** in every country
 - via presentations (theoretical part) and discussion with local key players
 - via site visits ("practical part")
- with as final goal:
 - describe what happens in every of the four countries
 - define guidelines for trade unions for Members-actions and measures
 - suggest guidelines for common EU-policy on work related Members
- task of every partner to prepare site visit in his country
 - practical part
 - propose hotel to partners
 - transport info (airport-hotel,...)
 - travelling: every partner arranges/pays his own trip
 -
 - follow good practice of CCOO in Madrid
- task of every partner to prepare site visit in his country
 - theoretical part **WE PREPARE A TEMPLATE!**
 - general data on your country (short!)
 - number of inhabitants
 - institutional structure
 - data on mobility (+ description how they were collected)
 - modal split data
 - car ownership
 - traffic accidents
 -
 - description of the general legal framework of mobility and mobility management policies in your country
 - obligation of mobility plans for companies?
 - contribution of employer in transport costs?
 - average cost of public transport for home

El proyecto E-COSMOS tiene como objetivo estudiar, cuantificar y definir procedimientos a favor de una movilidad sostenible desde el punto de vista social y medio ambiental para los trabajadores de la Unión Europea

E-Cosmos News
